SUMMARY

Java development professional with over 3 years of experience in banking systems development and IT project management, expert in backend development and process automation. My key achievements include implementing an e-invoice system handling 50,000+ daily transactions and optimizing database queries to achieve a 40% reduction in response time. Seeking a Java Developer position at Connectis where I bring my extensive experience in Java programming and SQL to support your mission of advancing digital healthcare solutions in Poland.

Core Competencies:

- Backend development (Java, Spring Boot, Hibernate, MySQL, PostgreSQL)
- IT project management (teams up to 12 members)
- Data analysis and business intelligence reporting
- Process automation and system diagnostics
